The background image shows a swimming pool with a winter cover installed. The pool is surrounded by a stone deck. In the background, there are mountains and a valley under a cloudy sky. A semi-transparent blue box is overlaid on the left side of the pool, containing the text 'Winterizing made simple and easy'.

Winterizing made  
simple and easy

# THE EPERVIER COVER

The Epervier cover simplifies and streamlines winterizing. It protects the pool against leaves and debris, UV light, photosynthesis, falling objects. It can be used with an existing fastening system.

Cleverly designed, this durable, light-weight cover guarantees optimum pool safety and complies with the French standard NF P 90-308 (depending on the finish).

Installation, removal and cleaning have been optimised with respect to conventional covers.

Its sober and discreet appearance allows it to blend into any pool environment.

Epervier is an opaque cover made of reinforced, pre-stressed, woven polyester, induction coated with PVC.

- Protects the exposed area of the pool lining,
- Inhibits photosynthesis,
- Catches leaves and debris,
- Secures the pool,
- Excellent tensile strength,
- Great dimensional stability,
- Light and easy to install,
- Suitable for large pools,
- Ideal for pre-drilled decks,
- Delivered with a storage bag.

## AVAILABLE COLOURS:

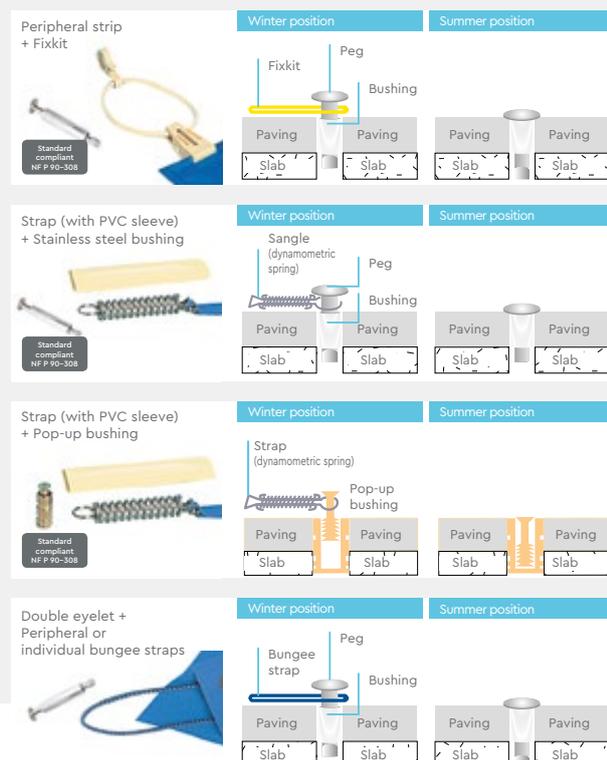

The surface in contact with the coping is protected by a wide, specially reinforced peripheral strip.

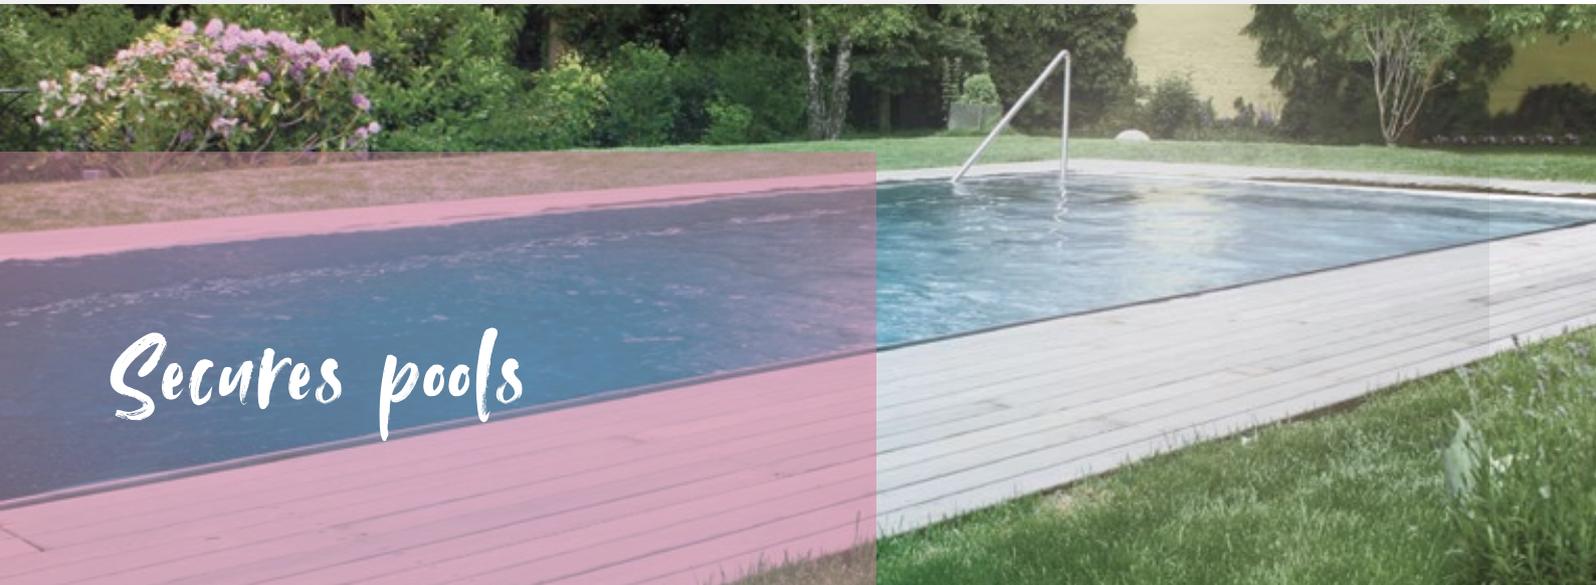

The underside of the strip in contact with the coping, is beige coloured to prevent staining.

The entire surface of the fabric, which is manufactured exclusively for our factories, is covered with micro-perforations that allow rain water to filter through but block light. Epervier covers are perfectly flat, even those made for pools that features steps and free-form pools.

Its PVC coating is UV stable and does not react with chlorinated products. The classic Epervier cover is edged with a peripheral strip run inside the hem of the cover. This allows a certain latitude when placing the fasteners.

# Secures pools

**Material:** 350g/m<sup>2</sup> grey/beige, blue/beige or green/beige;  
**Failure load:**  
Warp: 190 daN/5cm (+/-5%) ;  
Weft: 190 daN/5cm (+/-5%).

**Material:** 650g/m<sup>2</sup> grey, blue or green on top and beige underneath;  
**Failure load:**  
Warp: 180 daN/5 cm (+/-5%);  
Weft: 250 daN/5cm (+/-5%).

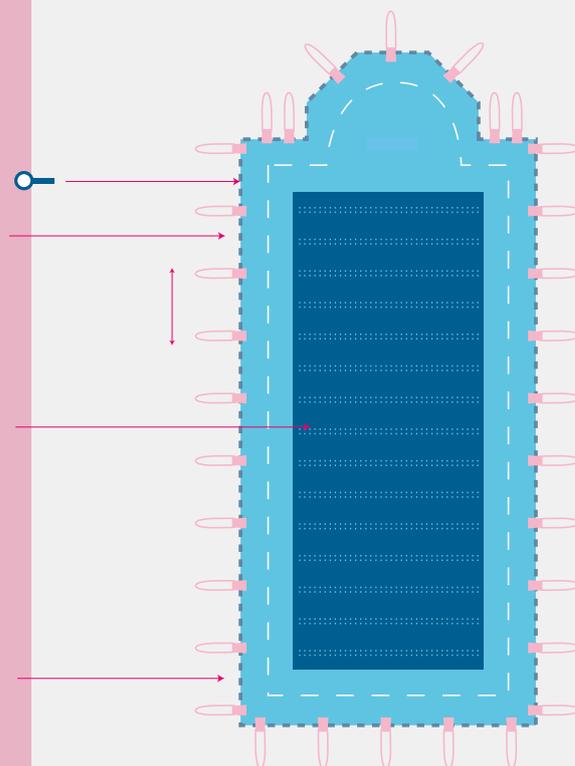

Peripheral strip enclosed in the hem of the cover.

Overlap of 35 cm beyond the water.

Fasteners at 1 m intervals (+/- 10%)

Micro-perforated central panel grey/beige, blue/beige or green/beige.

Peripheral reinforcing band in contact with the coping, width 52 cm.

## LEGAL NOTICE

Epervier covers comply with the French standard NF P 90-308 (May 2004 version concerning pool protection) in as far as all the components of the cover are provided by Procopi. A safety cover for pools intended to deny children under five access to the pool. This cover is no substitute for common sense or individual responsibility. Nor is it intended to replace the vigilance of parents and or responsible adults which remains key to ensuring the protection of young children.
